

SREEKARAN SRINATH

ss@sreekaran.com • in/sreekaransrinath

Software engineer with 4 years of experience building scalable platforms across startups and enterprises, bridging infra, UI, APIs, NLP, product development, and developer relations. **Work Authorization: U.S. Citizen.**

EXPERIENCE

Software Engineer II

Feb 2023 – Present

Boeing

New Providence, NJ

- Built classified intelligence management software for US Federal Government contracts.
- Reduced load times by **35%** with custom React components, React hooks, and TypeScript optimizations.
- Automated API dependency management and versioning, reducing build error occurrences by **40%**.
- Standardized design and slashed dev time by **75%** by leading a UI migration effort to MUI CRUD components.
- Led a state management migration from Recoil to Redux, fixing stability issues and state-related bugs.
- Cut deployment time in **half** by streamlining deployment processes and CI/CD pipelines with automated scripts.
- Hit **90%** test coverage with unit and integration tests (**Jest + PyTest**), catching more bugs before production.

Software Engineer

May 2021 – May 2022

Codemantra

Boston, MA (Remote)

- Built modules and APIs for processing (transform, label, validate) EPUB, PDF, JSON, and XML, increasing accuracy and cutting content transformation time by **60%**.
- Built libraries for PDF object detection, extraction, validation, and manipulation, improving processing efficiency.
- Improved document usability by **75%** by building Flask APIs to automate accessibility enhancements.
- Delivered Python and Java solutions for content management, transformation, and validation, handling rapidly changing specs with **<2%** downtime.

Developer Advocate Consultant (Contract)

Aug 2021 – Apr 2022

Dasha AI

White Plains, NY (Remote)

- Cutting-edge NLU and NLP frameworks for developer-focused conversational AI.
- Organized 4 hackathons over 7 months (averaged **700 participants/hackathon**) for product adoption, visibility, and developer outreach + education.
- Developed shelf strategies, integrations, collaborative blogs, and events with other companies in the same space.
- Built documentation (**docs.dasha.ai**), sandbox (**playground.dasha.ai**), demo apps, and GPT integrations.
- Curated hacker stories via blogs and videos, highlighting developers and their innovative use-cases.
- Hired and managed team of two developer advocates.
- Created and managed communities on Twitter (**0 to 6,000 members**) and Discord (**0 to 10,000 members**).

Software Engineer

Jun 2020 – Feb 2021

SPI Edge

Chennai, India

- Think tank/startup accelerator turning ideas into MVPs and scaling them from 1 to 10.
- Built a Python and JavaScript system to track habit formation via WhatsApp (pre-WhatsApp API).
- Deployed system to **200+** employees, driving a **50%** jump in habit streaks in **3** months.
- Delivered real-time tracking dashboards with React and Node.js.
- Led an accelerator team to get **15** hackathon-winning teams from zero to one, turning their ideas into start-ups.

SKILLS

Languages: Python, TypeScript, JavaScript, HTML/CSS, PostgreSQL, Java

Frameworks: React.js, Node.js, FastAPI, Recoil.js, Redux.js, Flask

Tools: AWS, Selenium, Git, Docker, Linux, Kubernetes, CI/CD

EDUCATION AND CERTIFICATIONS

Georgia Institute of Technology

Aug 2024 – May 2026

Master of Science, Computer Science (Machine Learning) (Part-time, Online); GPA: 4.0

Atlanta, GA

Anna University

Aug 2017 – Apr 2021

Bachelor of Engineering, Electronics and Communications Engineering

Chennai, India

Linux Foundation Certified Kubernetes Application Developer

Apr 2024
